Sub: Innovative and Interdisciplinary Programmes in Government/Aided Arts and Science Colleges affiliated to the Kerala University during 2020-21–Suggestions from IQAC – Regarding.

(Through the Principal)

Sir

The IQAC of Bishop Moore College, Mavelikara would like to put forth the following suggestions with regard to the introduction of new courses in Government/Aided Arts and Sciences colleges affiliated to the Kerala University during 2020-21

1. Considering the fast developments taking place in Business and Finance we suggest that the MA Economics programme may also include Business Economics or Financial Economics or Econometrics as specializations.
2. The M Com programme in Financial Market is a programme that has high demand . The specialization in Rural Management is already offered by many institutes in the discipline of Economics. So kindly include Financial Market also in the list of MCom course.
3. The MSc Zoology programme may also include wildlife as specialization which will make the course more job prospective.
4. Mathematics being the king of science seems to be excluded or sidelined from the whole purview of innovative courses. Kindly consider to include MSc Mathematics with Data Structure as specialization in the list of new courses.
5. The choices provided in the list of inter-disciplinary programmes seem to be very limited with very little scope for choices.
